COLD WEATHER INJURIES

CARBON MONOXIDE (CO) POISONING - invisible, odorless, colorless gas created when fuels (such as gasoline, wood, coal, natural gas, propane, oil, and methane) burn. The possibility for poisoning exists whenever a stove, fire, gasoline heater, or internal combustion engine is used indoors.

SYMPTOMS: Headache, dizziness, confusion, yawning, weariness, nausea, ringing in the ears and bright red color on lips and skin

COUNTER MEASURES

- Use only authorized heaters in well vented areas
- No sleeping in running vehicle
- Inspect heating system and fireplaces annually
- Install a CO detector

Slips and Falls

- Leading cause of our lost time accidents
- Snow & Ice Removal Policy
- Have a detail planned to remove snow
- Remove snow then salt the surface
